Alors que la notion meme de litterature suppose un travail d'ecriture et pose le probleme du statut de l'ecrivain, on s'interroge rarement sur les structures mentales que requiert l'acte d'ecrire, sur l'ecrit comme instrument de communication, voire d'action, sur les ressources de l'ecrit. Ces questions sont d'une importance toute particulière pour Rome et dans le moment charniere constitue par la f

Peu aprés la mort d'E. W. Beth, j'ai pu organiser a Paris, a l'Institut Henri Poincare, un Colloque a sa memoire. Je suis heureux qu'aujourd'hui les Actes de ce Colloque soient publies en un volume qui materialise l'honmage que ses amis, collegue et eleves ont voulu lui rendre. Ce Colloque international qui groupait des specialistes de nationalites diverses appartenant a de nombreuses disciplines, a fait ressortir la riche et la portée de l'oeuvre d'E. W. Beth et le rayonnement de sa personalite. Que Madame Beth veuille bien trouver ici l'honmage que nous adresses tous a la memoire de son mari
Dictionnaire Des Sciences Philosophiques
BoD – Books on Demand
The present publication is a continuation of two earlier series of chronicles, Philosophy in the Mid-Century (Firenze 1958/59) and Contemporary Philosophy (Firenze 1968), edited by Raymond Klibansky. As with the earlier series the present chronicles purport to give a survey
of significant trends in contemporary philosophi
cal discussion. The time space
covered by the present series is
(approximately) 1966-1978. The need for
such surveys has, I believe, increased
rather than decreased over the last years.
The philosophical scene appears, for
various reasons, more complex than ever
before. The continuing process of
specialization in most branches, the
emergence of new schools of thought,
particulariy in philosophical logic and the
language of philosophy, the convergence
of interest (though not necessarily of
opinion) of different traditions upon certain
prob lems, and the increasing attention
being paid to the history of philosophy in
discussions of contemporary problems are
the most important contributory factors.
Surveys of the present kind are a valuable
source of knowledge of this complexity
and may as such be of assistance in
renewing the understanding of one's own
philosophical problems. The surveys, it is
to be hoped, may also help to strengthen
the Socratic element of modern
philosophy, the dialogue or
Kommunikationsgemeinschaft. So far, four
volumes have been prepared for the new
series. The present chronicles in
Philosophy of Science (Vol. 2) follow the
chronicles in the Philosophy of Language
and Philosophical Logic (Vol

Logique philosophique / Volume 1
Philosophy of language, Philosophical
logic Springer Science & Business Media
This bilingual volume is the first in a
series, which has the ambition to present
the "jurisprudence" of the mechanism of
dispute settlement (DSM), in a simple,
coherent and systematic fashion.
The Transformation of Political Culture
1789-1848 Springer Science & Business
Media
The unity of science has been a widely
discussed issue both in the philosophy of
science and within several sciences.
Reductionism has often been seen as the
means of bringing the different sciences to
a fundamental unity by reference to some
basic science, but it shows many
limitations. Multidisciplinarity and
interdisciplinarity have also been proposed as
methodologies for attaining unity
without underestimating the diversity of
the sciences. This volume starts with a
clarification of the possible meanings of
this unity and then discusses the features of
the mentioned approaches to unity,
evaluating the success and the
shortcomings of the unification
programme among different sciences and
within a single science. Contents: The
General Framework: What Does "The Unity
of Science" Mean? (E Agazzi); The Unity of
Disunity (J Faye); Sciences of Nature and
Sciences of Man: On a Difference between
Natural Science and the Interpretive
Sciences of Man (F Collin); Natural
Sciences and Human Sciences (G M
Prosperi); Overcoming Reductionism:
Complexity, Reductionism, and the Unity
of Science (J Ricard); The Consilience
Approach to the Unity of Science (B
Kanitscheider); The Unity Within a Single
Science: The Problem of Unity in a Single
Field of Science (A Cordero); The Unity of
Particle Physics and Cosmology? The Case
of the Cosmological Constant (J Mosterin);
Is Quantum Mechanics a Universal Theory?
(B d'Espagnat); and other papers.
Readership: Graduate students and
academics in the philosophy of science.

Revolution on the political and social evolution of Germany, England, Italy and Russia; the crisis it brought about in the Catholic Church; and the difficulties encountered in determining the end of the Revolution. By showing that the upheaval in European politics and philosophy caused by the French Revolution continued to shape nations, peoples and thought, the texts brought together in this volume permit a better understanding of the event’s extraordinary complexity.

Revue contemporaine Elsevier

Selected contents of this volume (1999), collected in memory of Naphtali Kinberg:

Gabriel M. Rosenbaum, “A Certain Laugh: Serious Humor and Creativity in the Adab of Ibn al-Gawzi”;

This collection presents perspectives into the pristine field of phenomenology/philosophy of life conceived by Tymieniecka, initiated in the Analecta Husserliana and unfolding with each volume. This new and original philosophy reaches to the ‘inner workings of Nature’ as well as to the innermost recesses of the Human Creative Condition, opening a basic starting point for all philosophy. Life, ‘the theme of our times’, finds at last a profound philosophical treatment.

Dictionnaire philosophique de la religion, où l’on établit tous les points de la religion, attaqués par les incrédules, ou l’on répond à toutes leurs objections. Par l’auteur des Erreurs de Voltaire [i.e. Claude François Nonnotte]. Bloomsbury Publishing

This special issue of Labyrinth is the second part of a diptych dedicated to the eminent French philosopher François Laruelle in honor of his 80th Anniversary. The included essays deal with the Origins of Laruelle’s Non-Philosophy in Ravaisson’s Understanding of Metaphysics, the question of Religious Pluralism, the non-philosophical mystique and the rehabilitation of heresy, the analogies and differences of Laruelle’s non-philosophy to Iamblichus or Martin Heidegger. The contributors to this issue are Vincent Le, John M. Allison, Eleni Lorandou, Stanimir Panayotov, Ameen Mettawa, David Bremner, and Yvanka B. Raynova.

Studium Scribendi

Life Phenomenology of Life as the Starting Point of Philosophy Lulu.com

This book continues the series Select Proceedings of the European Society of International Law, containing the proceedings of the Third Biennial Conference organised by ESIL and the Max Planck Institute for Comparative Public Law and International Law in 2008. The conference was entitled ‘International Law in a Heterogeneous World’, reflecting an idea which is central to the ESIL philosophy. Heterogeneity is considered one of the pillars upon which Europe’s contribution to international law is built and the subject was considered in a number of panels, including such diverse topics as migration, the history of international law, the rules on warfare and international environmental law.
